

Certifying the Professional Marine Technician

Setting Standards for Safer Boating

Marine Systems Certification

When: December 14–17, 2010

Where: Mystic Seaport of America
75 Greenmanville Avenue
Mystic, CT 06355-0990

This four day systems course will draw key information from 21 different ABYC Standards as they apply to boat component selection and installation. Best industry practices will be a part of the body of knowledge that a certified technician will be expected to be proficient in regards to Potable Water Systems, Waste Water Systems, Tankage, Plumbing, Electrical Installation, System Monitoring, Compressed Gas Systems for cooking and heating, Hydraulic Systems, AC and Refrigeration Systems, and Pump Systems. Each student is shipped a study guide upon registration. The class concludes with a 200 question certification exam.

Please be sure to bring your copy of the ABYC Marine Systems Certification Study Guide with you or call our office to make sure you have a copy prior to class.
